

BOWERBIRD
ENERGY CONTRACTORS

Company Overview

Bowerbird Energy is an energy services contractor specializing in designing, building, and maintaining renewable energy and energy efficiency projects for commercial, industrial, and government clients.

Through strategic engineering, procurement, and construction practices we deliver resilient, efficient, and affordable projects that meet aggressive environmental goals and financial returns.

Founded in 2014 by USMC combat-veteran Chris Rawlings, Bowerbird Energy is a (SBA Certified) Service-Disabled Veteran-Owned Small Business (SDVOSB), active in government contracting.

Silver Diner Restaurant Group

How We're Different

Designing, building, and maintaining our critical energy infrastructure requires expertise in four areas: engineering, procurement, construction, and sustainability. Expertise in those areas is the foundation of our company.

An aerial photograph of a campus or institutional site. In the foreground and middle ground, there are several large, multi-story buildings with flat roofs, surrounded by parking lots filled with cars. The campus is bordered by dense green trees and rolling green hills in the background. The lighting suggests it might be late afternoon or early morning, with a soft glow. The text is overlaid on this image.

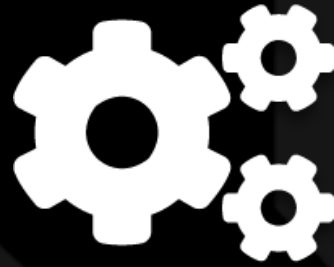

WHO TRUSTS US AND WHY?

Since 2014, real estate developers, property managers, government agencies, and more have called on Bowerbird Energy to deliver energy conservation projects on time and within budget. They know that Bowerbird not only produces verifiable savings, but also meets or exceeds financial and sustainability goals.

Veteran-Owned and Operated Core Values
